

EMERGENCY STOP PULL WIRE LABELS

P : 02 4964 9660 **W** : www.prolecaustralia.com.au **E** : sales@prolecaustralia.com.au

Prolec has designed a purpose made emergency stop conveyor lanyard label that complies with the relevant Australian standards. As a requirement of AS/NZs4024.3610:2015, all conveyor lanyard pull wire cables should be labelled every 30 meters indicating that the lanyard can be used as an emergency stop. Our emergency stop lanyard gives you a industrial strength proven solution to this requirement by offering a heavy duty, UV Rated, weatherproof, fabric vinyl, emergency stop pull label. The Label is 200mm long, 50mm wide produced from class 1 reflective red and white vinyl as per common practice for emergency stop labelling in Australia. Our emergency stop lanyard comprises of 4x nickel eyelets, which can be attached to the lanyard in various orientations using cable ties or tie wire. It allows for clear vision from various angles including when looking down the line of the conveyor. Prolec can also supply a class 2 reflective sticker adhered to vipet (plastic), Aluminium or Stainless Steel sheet, which can attach to the conveyor lanyard via a stainless steel wire rope grip (Supplied with each label).

CESTOP-150100A	Class 2 reflective Conveyor E/Stop lanyard label	Aluminium 150x100mm
