

## **BOOTPRO OPERATING MANUAL**

When used properly the Bootpro is designed to deliver effective cleaning to footwear. In order to do this, the motorized brushes must spin at a moderate rate of speed & care must be taken to use the machine correctly.

Please ensure you have read & understood the below operating procedure.

Please note the following

- ! Shoes must be tightly & securely laced & tied.
- ! No open footwear to be used on machine.
- ! If replacing any parts unplug & isolate the unit before you proceed.

**Step 1.** Connect BootPro to correct mains power supply depending on which model you have.

**Step 2.** Stand as close to the machine as possible.

**Step 3.** Hold handle, press green button.

**Step 4.** Insert shoe onto rotating brushes, ensure your boot touches the backstop, move your foot from side to side & back & forth.

**Step 5.** Once clean press red button.

**Step 5.** Repeat step 3,4 & 5 on 2<sup>nd</sup> shoe.
