- 316 Stainless Steel**
- Pre-wired for electrical connection**
- IP65 Water Resistant**
- Longlasting & Durable**
- Heavy Duty 3 Sided Brush**
- Custom Designs Available**

The Bootpro is a motorised industrial strength boot cleaner. Ideal for areas where there is a build-up of dirt, mud, or any type of grit that needs to be removed from boots.

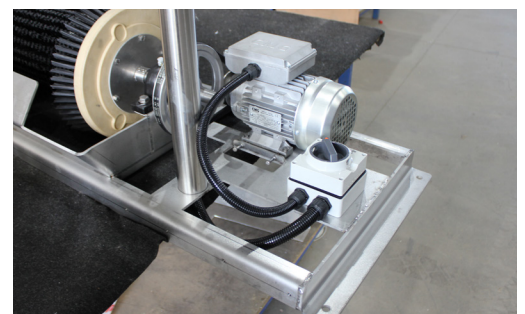

Suggested Applications: Mine Sites Quarries, Industrial Workshops, Agricultural Industries, Construction Sites Smelter, Food Processing, High Wash Down Areas, And More

Excess mud on your work boots will dry up and turn to dust. This can lead to a dusty work environment, affecting the cleanliness of your offices and work site areas. The BootPro is the ultimate solution to remove that stubborn mud and reduce the risk of dust inhalation. It has been engineered to tackle the harshest of conditions. Manufactured out of marine grade 316 stainless steel and using three heavy-duty brushes, allows for clean both sides and underneath the boot with ease.

The BootPro also comes with an ergonomic handle for stability when using. With an integrated start/stop station conveniently placed for ease of control during operation. Get yours today and experience a cleaner and healthier work environment.

EXTRA LOW VOLTAGE BOOT CLEANER

The BootPro ELV is a world-first revolutionary low-voltage motorised industrial strength boot cleaner. Specifically designed & manufactured for the mining industry with a focus on performance and durability to enhance machine operator safety. By removing the dirt & mud from footwear before entering the machine operator cab it minimises the dust particles created when the mud dries out, keeping the cab cleaner & safer for operators. Designed to combat harmful airborne contaminants, it's the perfect solution for areas where dirt, mud and grit accumulate, ensuring cleaner boots and a safer working environment.

Mud and debris on work boots can dry, becoming dust that not only dirties your workspace but also poses a risk of respirable particulates. The BootPro ELV is the perfect tool to support existing safety systems to meet ISO 23875 requirements for cab air quality, effectively removes stubborn mud and helps protect your workforce from exposure to hazardous particles by removing the mud & dirt before the operator enters the cabin.

Constructed from marine-grade 316 stainless steel, the BootPro ELV features three heavy-duty brushes to clean both sides and the sole of your boots effortlessly. Easily mounted on industrial vehicles, the BootPro ELV offers seamless installation and superior boot-cleaning performance, making it a must-have for any worksite.
